

IMPORT HEALTH STANDARD FOR THE IMPORTATION INTO NEW ZEALAND OF SPRAY- DRIED BOVINE BLOOD PRODUCTS FOR FURTHER PROCESSING INTO ANIMAL FOOD FROM THE UNITED STATES OF AMERICA

**Issued pursuant to Section 24A of the Biosecurity Act 1993 (the Act)
Dated: 31 October 2014**

USER GUIDE

The information in Ministry for Primary Industries (MPI) animal and animal product import health standards is presented in numerically ordered sections with descriptive titles. Sections are grouped into one of four parts, designated alphabetically.

Part A. GENERAL INFORMATION contains sections of general interest, including those relating to the legal basis for MPI import health standards and the general responsibilities of every importer of animals and animal products.

Part B. IMPORTATION PROCEDURE contains sections that outline the requirements to be met prior to and during importation. Whether a permit to import is required to be obtained prior to importation is noted, as are conditions of eligibility, transport and general conditions relating to documentation accompanying the consignment.

Part C. CLEARANCE PROCEDURE contains sections describing the requirements to be met at the New Zealand border and, if necessary, in a transitional facility in New Zealand prior to any consignment being given biosecurity clearance.

Part D. ZOOSANITARY CERTIFICATION contains model health certification which must be completed by the appropriate personnel as indicated in the certification and accompany the consignment to New Zealand. When MPI has accepted health certification produced by a government authority in the exporting country as meeting the requirements of the model health certification this is noted. When no health certification is required to accompany consignments Part D. will note “none required”.

PART A. GENERAL INFORMATION

1 IMPORT HEALTH STANDARD

- 1.1 Pursuant to section 24A of the Act, this document is the import health standard for the importation into New Zealand of spray-dried bovine blood products for further processing into animal food from the United States of America.
- 1.2 Obtaining biosecurity clearance for each consignment of spray-dried bovine blood products for further processing into animal food imported into New Zealand from the

United States of America is dependent upon the consignment meeting the requirements of this import health standard.

- 1.3 This import health standard may be reviewed, amended or revoked if there are changes in New Zealand's import policy or the animal health status of the originating country, or for any other lawful reason, at the discretion of the Director-General.

2 IMPORTER'S RESPONSIBILITIES

- 2.1 The costs to MPI in performing functions relating to the importation of spray-dried bovine blood products shall be recovered in accordance with the Act and any regulations made under that Act.
- 2.2 All costs involved with documentation, transport, storage and obtaining a biosecurity direction and/or biosecurity clearance shall be borne by the importer or agent.
- 2.3 The feeding of ruminant protein (i.e. bovine blood products) in any form, composition or admixture to ruminants (e.g. cattle, sheep, goats, deer, buffalo) is prohibited under the Biosecurity (Ruminant Protein) Regulations 1999.
- 2.4 Products containing ruminant protein, or any material from premises that render, produce or utilise ruminant protein, must not be sent for further processing to any premises where feed suitable for ruminants is produced under the Biosecurity (Ruminant Protein) Regulations 1999, unless the feed manufacturer has an MPI approved Ruminant Protein Control Programme in place.
- 2.5 Consignments containing ruminant protein, or any material from premises that render, produce or utilise ruminant protein, must be labelled in accordance with clauses 13 and 14 of the Biosecurity (Ruminant Protein) Regulations 1999.

3 DEFINITION OF TERMS

Animal food

This refers to food suitable for direct feeding to non-ruminant animals, birds and fish.

Biosecurity clearance

A clearance under section 26 of the Act for the entry of goods into New Zealand.

(Explanatory Note: Goods given a biosecurity clearance by an inspector are released to the importer without restriction)

Competent Authority

The Veterinary or other Governmental Authority of an OIE Member, that has the responsibility and competence for ensuring or supervising the implementation of animal health and welfare measures, international veterinary certification and other standards and recommendations in the *Code* in the whole territory.

Equivalence

Acceptance by MPI that the circumstances relating to the importation of a consignment are

such that the health status of the consignment is equivalent to the health status of a consignment that complies with the requirements of the import health standard.

Inspector

A person who is appointed an inspector under section 103 of the Act.

(Explanatory Note: An inspector is appointed to undertake administering and enforcing the provisions of the Act and controls imposed under the Hazardous Substances and New Organism Act 1996, and the Convention on the International Trade in Endangered Species)

Official Veterinarian

A veterinarian authorised by the Competent Authority of the country to perform certain designated official tasks associated with animal health and/or public health and inspections of commodities and, when appropriate, to certify in conformity with the provisions of the OIE *Code* Chapter for certification procedures.

OIE

The World Organisation for Animal Health.

4 EQUIVALENCE

4.1 The Chief Technical Officer (CTO) may approve measures under section 27(1)(d) of the Act, different from those set out in this IHS, that may be applied to effectively manage risks associated with the importation of these goods. If an equivalent measure is approved a permit to import may be issued under section 24D(2) of the Act, if the Director-General considers it appropriate to do so.

4.2 Permit applications can be accessed here:

<http://www.biosecurity.govt.nz/forms/imports-animal-products>.

PART B. IMPORTATION PROCEDURE

5 PERMIT TO IMPORT

5.1 Importation into New Zealand of spray-dried bovine blood products for further processing into animal food from the United States of America which meet the requirements of this import health standard may, subject to sections 27 and 28 of the Act, be given biosecurity clearance and do not require a biosecurity direction to a transitional facility. As such, they do not require a permit to import.

6 DOCUMENTATION ACCOMPANYING THE CONSIGNMENT

6.1 The consignment shall be accompanied by appropriately completed health certification which meets the requirements of PART D. ZOOSANITARY CERTIFICATION.

- 6.2 Documentation shall be in English, but may be bilingual (language of exporting country/English).
- 6.3 It is the importer's responsibility to ensure that any documentation presented in accordance with the requirements of this import health standard is original (unless otherwise specified) and clearly legible. Failure to do so may result in delays in obtaining biosecurity direction and/or clearance or rejection of consignments.

PART C. CLEARANCE PROCEDURE

7 BIOSECURITY CLEARANCE

- 7.1 Upon arrival in New Zealand the documentation accompanying the consignment shall be inspected by an Inspector at the port of arrival. The Inspector may also inspect the consignment, or a sample of the consignment.
- 7.2 Providing that the consignment meets all requirements noted under PART D. ZOOSANITARY CERTIFICATION, the consignment may, subject to sections 27 and 28 of the Act, be given a biosecurity clearance pursuant to section 26 of the Act.

PART D. ZOOSANITARY CERTIFICATION

8 NEGOTIATED EXPORT CERTIFICATION

The following Model Zoosanitary Certificate contains the information required by MPI to accompany imports of spray-dried bovine blood products for further processing into animal food into New Zealand from the United States of America:

9 MODEL ZOOSANITARY CERTIFICATION

COMMODITY: Spray-dried bovine blood products for further processing into animal food from the USA

Certifying Authority:

Agency:

Department:

Country:

I. ORIGIN OF THE CONSIGNMENT

- i. Name(s) and address(s) of processing premises:
- ii. Processing premises registration number (if applicable):

II. CONSIGNMENT DESCRIPTION

- i. Number of packages:
- ii. Nature of packaging:
- iii. Nature of the goods:
- iv. Animal species product derived from:
- v. Number of the container(s) and container seal number(s):
- vi. Weight in kilograms (kg):

III. CONSIGNMENT INFORMATION

- i. Name and address of exporter:
- ii. Name and address of New Zealand importer:

IV. DESTINATION OF THE CONSIGNMENT

- i. Name and address of New Zealand importer:

V. SANITARY INFORMATION

VETERINARY CERTIFICATE

I,, an Official Veterinarian authorised by the USA Government certify, after due enquiry, with respect to the bovine blood products identified in this Zoosanitary Certificate that:

- 9.1 Foot and mouth disease and rinderpest have not occurred in the United States of America during the twelve months immediately prior to manufacture of the products.
- 9.2 The products originate from a government licensed slaughtering establishment that slaughters animals for human consumption and operates under Government Veterinary Supervision.
- 9.3 The products are derived from animals subjected to ante-mortem and post-mortem inspection and were found to be free from signs of disease.
- 9.4 The products are suitable to be used to manufacture animal food.
- 9.5 The products have been packed in new, clean packaging.

Signature of *Official Veterinarian*:

Date:

Name and Address of Office:

N.B. Official stamp of the government veterinary authority of the exporting country must be applied to all pages of the Zoosanitary Certification.
